## Hosting Requirements

- Operating System: Linux 64-bit
- Web Server: Apache Web Server 2.4.7
- PHP: PHP 5.5.9
- Database: MySQL Server 5.5.38
- Wordpress Version: Wordpress 3.9
- WooCommerce Version: WooCommerce 2.2.8
- WC Autoship Version: WC Autoship 2.0

## Installation

### Install and Configure Required Plugins

1. Extract the archive to the plugins folder of your Wordpress site (usually /wp-content/plugins/).
2. Log in to Wordpress as an administrator and navigate to the Plugins list. Find and activate the WC Autoship PayPal Payments plugin.
3. Navigate to WooCommerce > Settings > Checkout > WC Autoship PayPal Payments
4. Complete the fields in the WC Autoship PayPal Payments settings form. See reference section A for field descriptions. Make sure that this payment gateway is enabled.

## Payment Gateway Settings

### Required PayPal Account Settings

1. Billing Agreements must be **enabled**.

# Testing the Payment Gateway

## Testing Checkout

1. Add a product to the shopping cart with a selected Auto-Ship option.
2. Navigate to the checkout page.
3. Select the PayPal payment method (titled "PayPal" by default).
4. Complete the checkout with PayPal.

If the checkout is successful, a new order will be created, and a new Auto-Ship schdule will be available on the My Account page.

## Testing Auto-Ship Schedules

1. Navigate to the My Account page. You should see your Auto-Ship schedules at the top of the page.
2. Click the button to Change Billing.
3. Select the PayPal payment method (titled "PayPal" by default).
4. Complete the update with PayPal.

If the update is successful, the Payment Info section will be updated with the PayPal account.

# Reference

## A. PayPal Settings
